Art Unit:\1771

- 1. Figures 9A and 9B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).
- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2, 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakayama et al, U.S. Patent No. 5,277,966.

Nakayama et al discloses a woven fabric comprising warp and west threads wherein at least some of the warp threads are coated with a thermoplastic material. The ends of the fabric may be joined together. The thermoplastic coated fibers may be disposed across the fabric.

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakayama et al, U.S. Patent No. 5,277,966. Nakayama et al discloses a woven fabric comprising warp and west threads wherein at least some of the warp threads are coated with a thermoplastic material. The ends of the fabric may be joined together. The thermoplastic coated fibers may be disposed

Serial Number: 09/033,909

Art Unit: 1771

across the fabric. Nakayama et al differs from the claimed invention because Nakayama et al does not teach that the welding portion extends from the fixing portion as claimed in claims 10-12. However, since Nakayama et al discloses a fabric which may be joined together at any portion, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have selected which portions would be joined together depending upon the intended use of the product.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth M. Cole whose telephone number is (703) 308-0037. The examiner may be reached between 6:30 AM and 5:00 PM Monday through Thursday.

Inquiries of a general nature may be directed to the Group Receptionist whose telephone number is (703) 308-0661.

The fax number for official faxes is (703) 305-5408. The fax number for official after final faxes is (703) 305-3599. The fax number for unofficial faxes is (703) 305-5436.
